Our Clients

Over 300 companies worldwide have trusted us with their projects:

IT Craft's Professional Recognition

Growth is one of the core values within our company.

We focus on pursuing knowledge, constantly investing in developing our skills and expertise to enhance our IT solutions.

Outsourcing and Outstaffing at IT Craft

Outsourcing

Project Autonomy: Maintain full project control, complemented by IT Craft's experts.

Streamlined Management: Focus on your business's growth, free from day-to-day oversight.

Turnkey Team and Processes: Clients receive a cohesive team with established workflows.

Goal Alignment: Expect commitment to project goals, ensuring delivery as per the service level agreement.

Global Talent: Access to top software engineers worldwide.

Outstaffing

Cost-Effective Resourcing: Utilize IT Craft's talent on-demand to avoid the expenses of permanent staff.

Seamless Integration: Incorporate IT Craft's specialists into your team for cohesive outstaffing solutions.

Transparency: Easy tracking of progress and results.

Flexibility: Scale team size as needed.

Control: Direct oversight of the development process.

Our Workflow at It Craft

Our operations prioritize precision and quality to align our expertise with your project needs seamlessly.

IT staff augmentation for Amesto Translations' cloud portal development

Industries: Translation

Duration: 2017 – 2020

Technology Stack

- Amesto Secure/Back Client Hub: MySQL, Laravel, JavaScript, React, Google Charts
- Web Instant Quote (Translate Now): JQuery, HTML5, PHP, Silex, Stripe, MySQL

Amesto Translations needed to modernize the cloud portal to enhance digital expansion and streamline translation processes.

IT Craft took over the project in 10 days, fixed bugs, updated technologies, and launched a new system within seven months, improving user experience, compliance, and workflow, boosting revenue and market position.

CLIENT'S TESTIMONIAL

“We know who’s working on what, so we can get the tickets directly to them. The project manager now keeps track of time and other logistical elements.”

Head Of Digital Business & Product Development, Amesto

Fixed-price iOS app from scratch for connecting young athletes and coaches

Industries: Social Network, Sports

Duration: 2021 – 2022

Technology Stack

- Back-End: Symfony, Node.js, Docker, Redis, Keycloak, AWS
- Front-End: TypeScript, React.JS
- iOS Mobile: UIKit, iOS, MVP, Swift, Alamofire, Socket.io, SnapKit

RooQi, a sports social network, needed a clear vision, basic functionality, and budget adherence. IT Craft conducted a thorough analysis, prepared requirements, delivered the app design, and selected the tech stack.

This resulted in a timely MVP launch, adherence to budget, and a high-quality solution.

CLIENT'S TESTIMONIAL

"Their dedication and commitment speak volumes about what type of company they have."

Transportation management startup for truckload shipments from scratch

Industries: Logistics, Shipment, and Transportation

Duration: 2017 – ongoing

Technology Stack

- Front-End: Angular, TypeScript
- Back-End: .NET, Azure SQL, MongoDB Atlas, Azure Cloud
- Additional Tools: Azure App Service, MailGun API, Stripe, Recurly API, Google Maps API, project44 API

MyCarrierTMS is a transportation management portal for truckload shipments built from scratch to meet logistics business needs. MyCarrier received the FreightWaves FreightTech 25 Award, was named the leading TMS software by G2, and surpassed Uber Freights.

The result was a timely MVP launch, expansion to full-truck-load shipments, and 24/7 availability with improved stability and scalability.

CLIENT'S TESTIMONIAL

"IT Craft delivers on time and budget. We're really happy with their whole team—they're professional and transparent, giving us access to everyone on the team. They provide feedback and make suggestions, acting more like a colleague than a hired agency."

Chris Scheid, Founder

Custom VR Booth development for Omni Arena

Industries: VR

Duration: 2018 – ongoing

Technology Stack

- Front-End: AngularJS
- Back-End: .NET, .NET Core, Unreal Engine
- Infrastructure: Docker, GitLab, GitLab CI, Mosquitto, Minio, LiteDB

The project aimed to create a VR booth combining 4 VR treadmills. Challenges included integrating new functionality into an existing system, reworking legacy code, and enabling free movement inside Omni Arena.

IT Craft delivered a stable, high-performing system with fine-tuned software and hardware synchronization.

CLIENT'S TESTIMONIAL

"It's been a great relationship. We started working with them in a very time-sensitive period. We needed to prepare software for Omni Arena, which we were introducing just six months later. And we got it done!"

Jan Goetgeluk, Founder And CEO

Comprehensive expansion & maintenance for LimpidMarkets finTech platform

Industries: FinTech

Duration: 2018 – ongoing

Technology Stack

- Front-End: AngularJS, TypeScript, React.JS, Redux, CSS3
- Back-End: Symfony, MySQL, RabbitMQ, Redis, Node.js, Express, TypeScript
- Infrastructure: Docker, AWS, Jenkins, Groovy, Ansible, Terraform

LimpidMarkets faced challenges like smooth project transfer, in-depth project detail analysis, and risk management. IT Craft ensured a high-quality technical solution with regular progress updates.

The platform's users include high-profile financial institutions and members of LBMA, such as Morgan Stanley, BNP Paribas, Citibank, and Deutsche Bank.

CLIENT'S TESTIMONIAL

They always try to find solutions for any problem that comes up, whether it's an additional workload or having to come up with a creative fix to a technical or organizational issue. IT Craft's impressive development work has increased the business by 35%–40%”

IT staff augmentation & digital transformation for Adorama's e-commerce platform

Industries: E-Commerce

Duration: 2007 – 2019

Technology Stack

- Web Technologies: C#, ASP.NET
- Application Framework: .NET Framework
- Front End: JQuery, JavaScript
- Back End: ASP MVC, NHibernate, Dapper ORM systems, Endeca search engine, Castle Windsor IoC, MS SQL

Adorama, the largest photo equipment retailer in the USA, faced performance and scalability issues. IT Craft revitalized the platform by streamlining staff augmentation, aligning with corporate culture, and implementing strong HR strategies.

The platform achieved 99.8+% uptime, predictable delivery, and reduced integration time, enhancing reliability and satisfaction.

DevOps consulting & infrastructure transformation for MyPlace Connect

Industries: Marketing

Duration: 2018 – ongoing

Technology Stack

- Infrastructure: AWS, Kubernetes, Docker, Terraform, Jenkins, Bitbucket, Prometheus, Grafana
- Tools: ArgoCD, Kustomize, BitNami Sealed Secrets, HashiCorp Vault

MyPlace Connect faced scalability and reliability challenges. IT Craft's DevOps team audited the infrastructure, proposed a roadmap, migrated to EKS, and implemented monitoring solutions.

This led to a fault-tolerant infrastructure with 99.8% uptime, a 30% customer increase in 6 months, and up to 50% cost savings on scalability.

Custom web platform development for XPERTyme telemedicine services

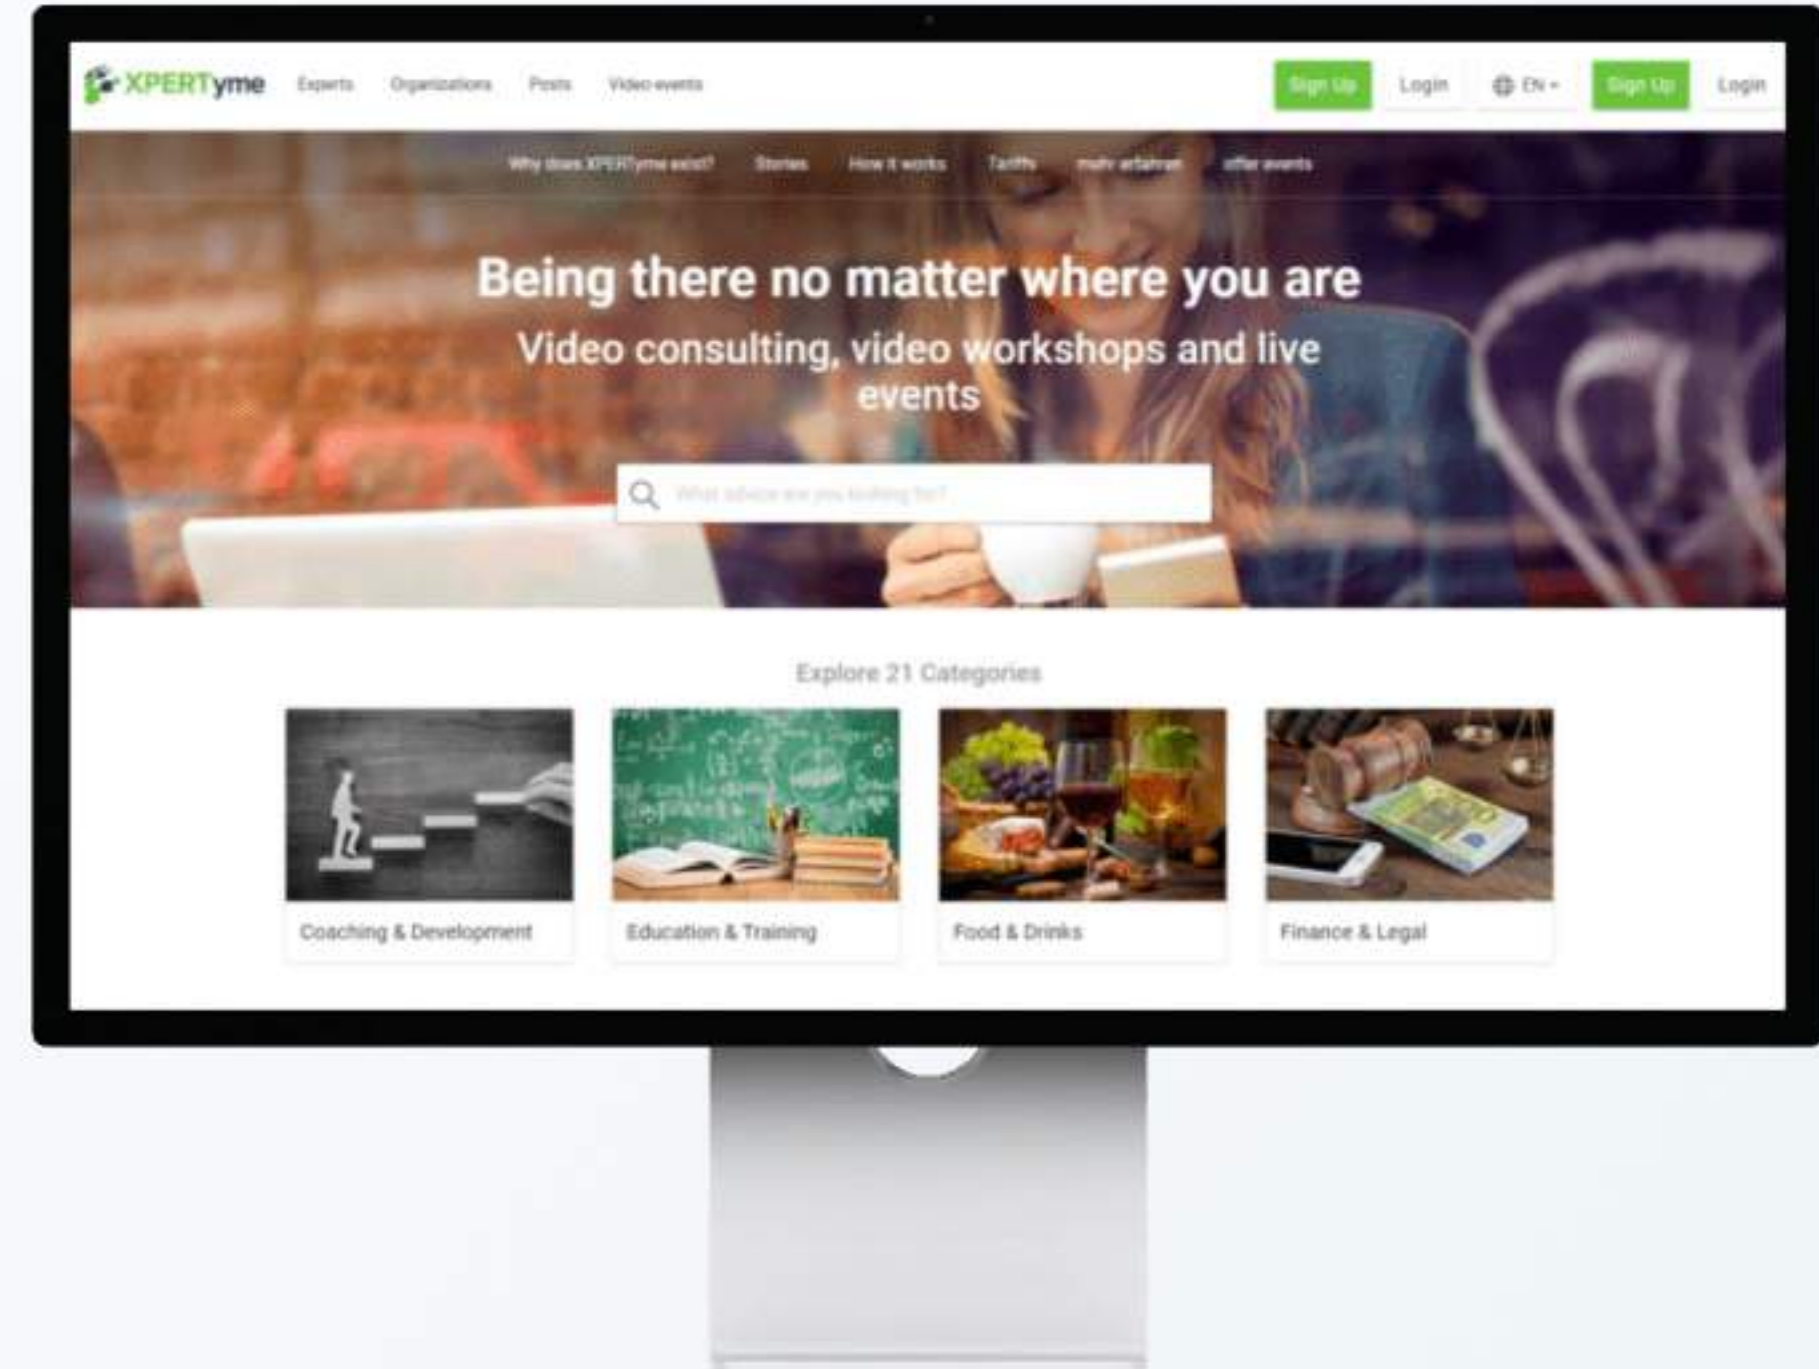

Industries: Healthcare

Duration: 2016 – ongoing

Technology Stack

- Front-End: Angular, Socket.io, Material
- Back-End: PHP, Node.js, Java, Docker, Auto Scaling
- Security: OAuth, Data Encryption

XPERTyme is a certified, secure platform for doctors that facilitates telemedicine consultations. It enables physicians from various specialties to offer their services flexibly and securely. The platform is also suitable for internal clinic use and supports video consultations. IT Craft overcame challenges such as undefined requirements, and a tight deadline by auditing the code, developing core functionality, and expanding the project, ultimately delivering fully functional solution.

CLIENT'S TESTIMONIAL

“We have established 50–70 very big leads greatly interested in our platform. It’s really based on what IT Craft has built within a short time frame. We have agreements in place that would not have been possible without IT Craft.”

Full-cycle development, DevOps, and AI integration for Flexwise Health's workforce optimization

Industries: Healthcare

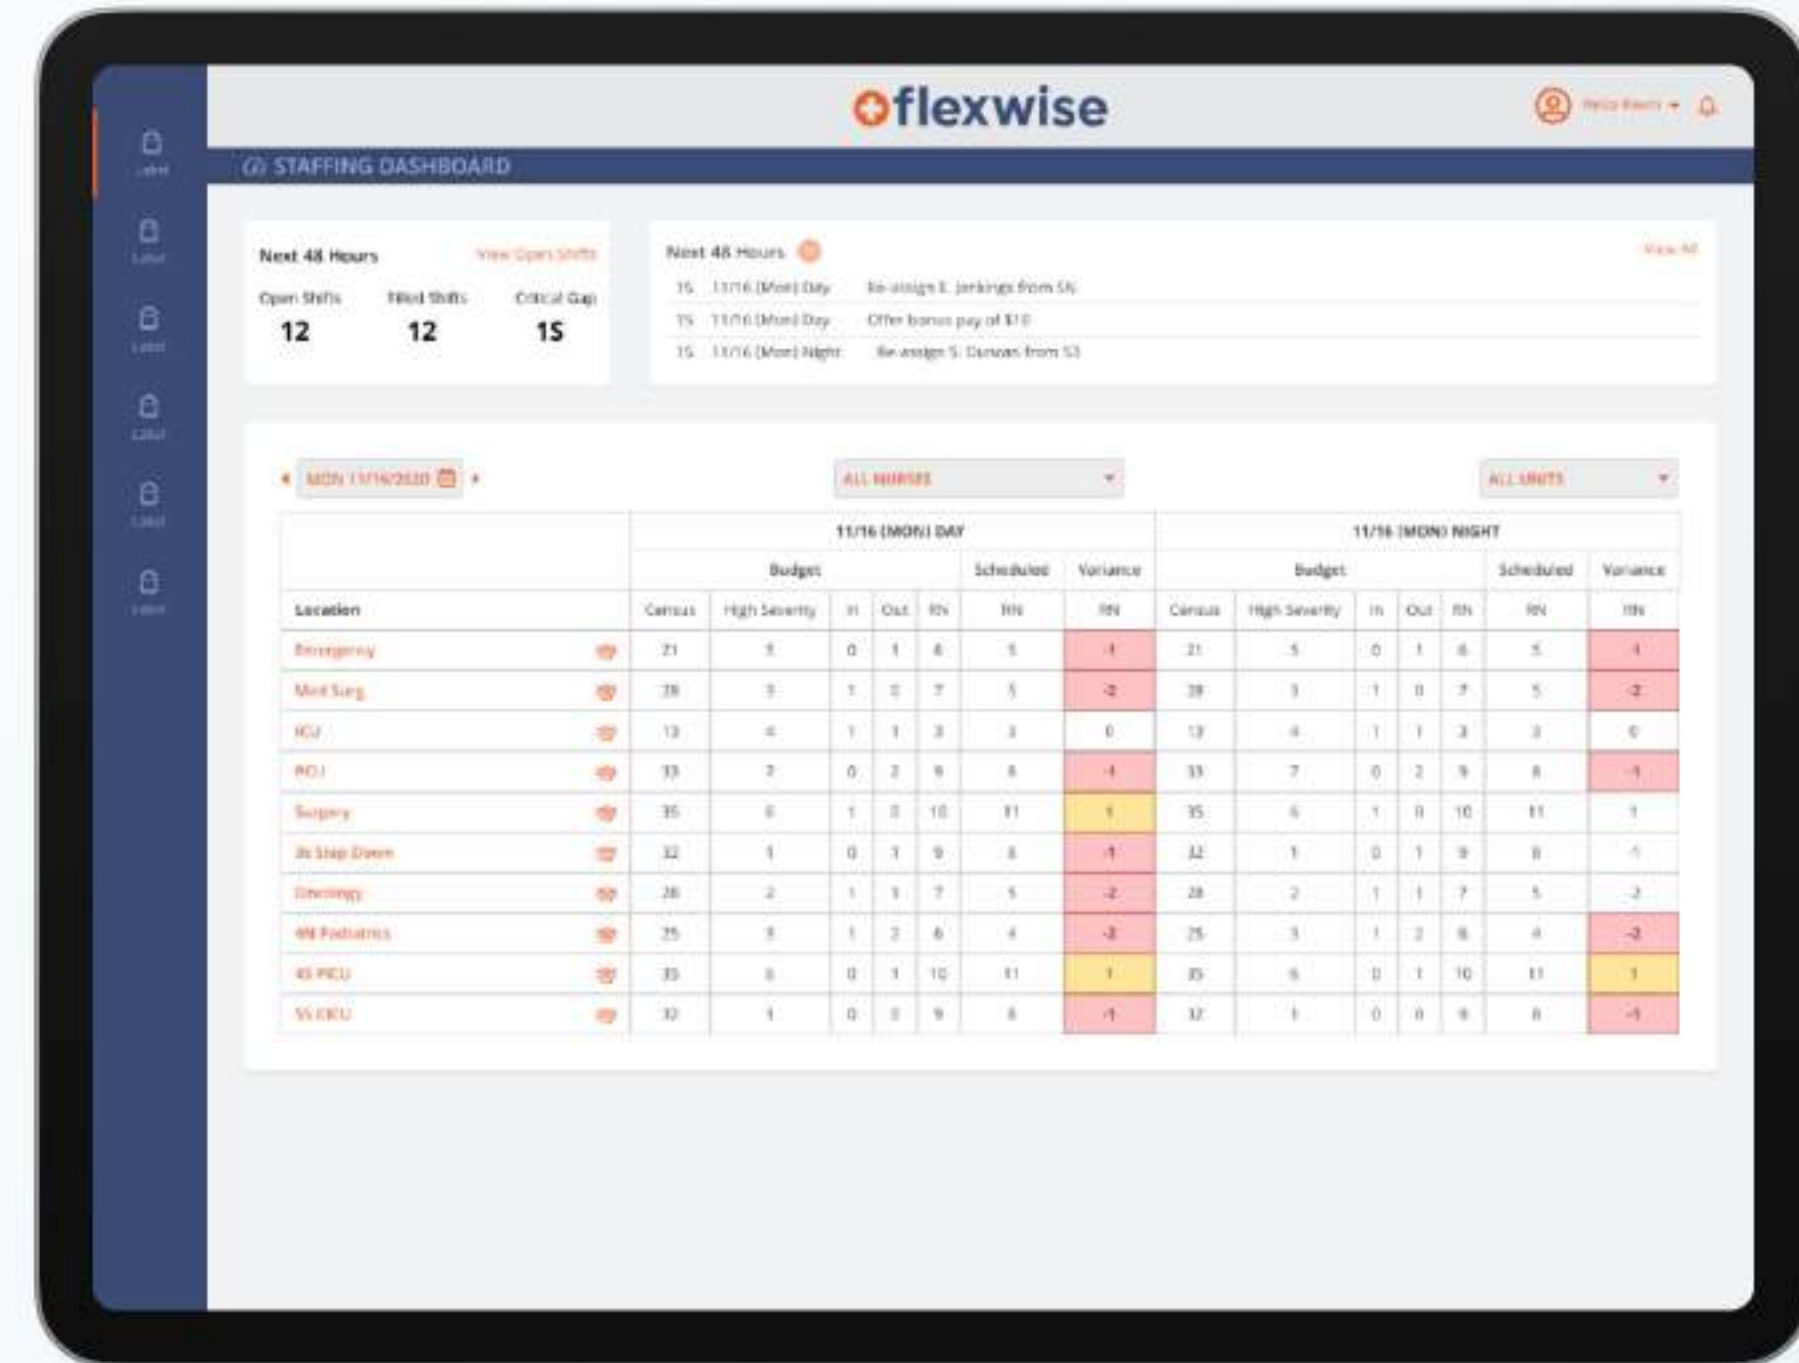

Duration: 2018 – ongoing

Technology Stack

- Infrastructure: AWS, Kubernetes, Terraform, Helm, Jenkins, Groovy, Prometheus, Grafana, ArgoCD, MongoDB Atlas, MSSQL, Elasticsearch
- Back-End: C#, ASP.NET Core, JavaScript, Node.js, NestJS, Python
- Front-End: React, Redux Form, Redux toolkit/thunk, TypeScript

Flexwise Health is a workforce optimization solution for hiring and managing nursing professionals. The project involved breaking down monolithic software into microservices, integrating new functionality, and ensuring smooth knowledge transfer.

IT Craft delivered a timely solution, increased stability, implemented predictive analytics, and enabled smooth project expansion. As a result, the platform saw a 30% increase in customers within 6 months.

CLIENT'S TESTIMONIAL

“The team makes good suggestions that not only make their life easier as a developer but also make the product better in the long run as well.”

Revolutionizing sports training management: cross-platform app development

Industries: Sports

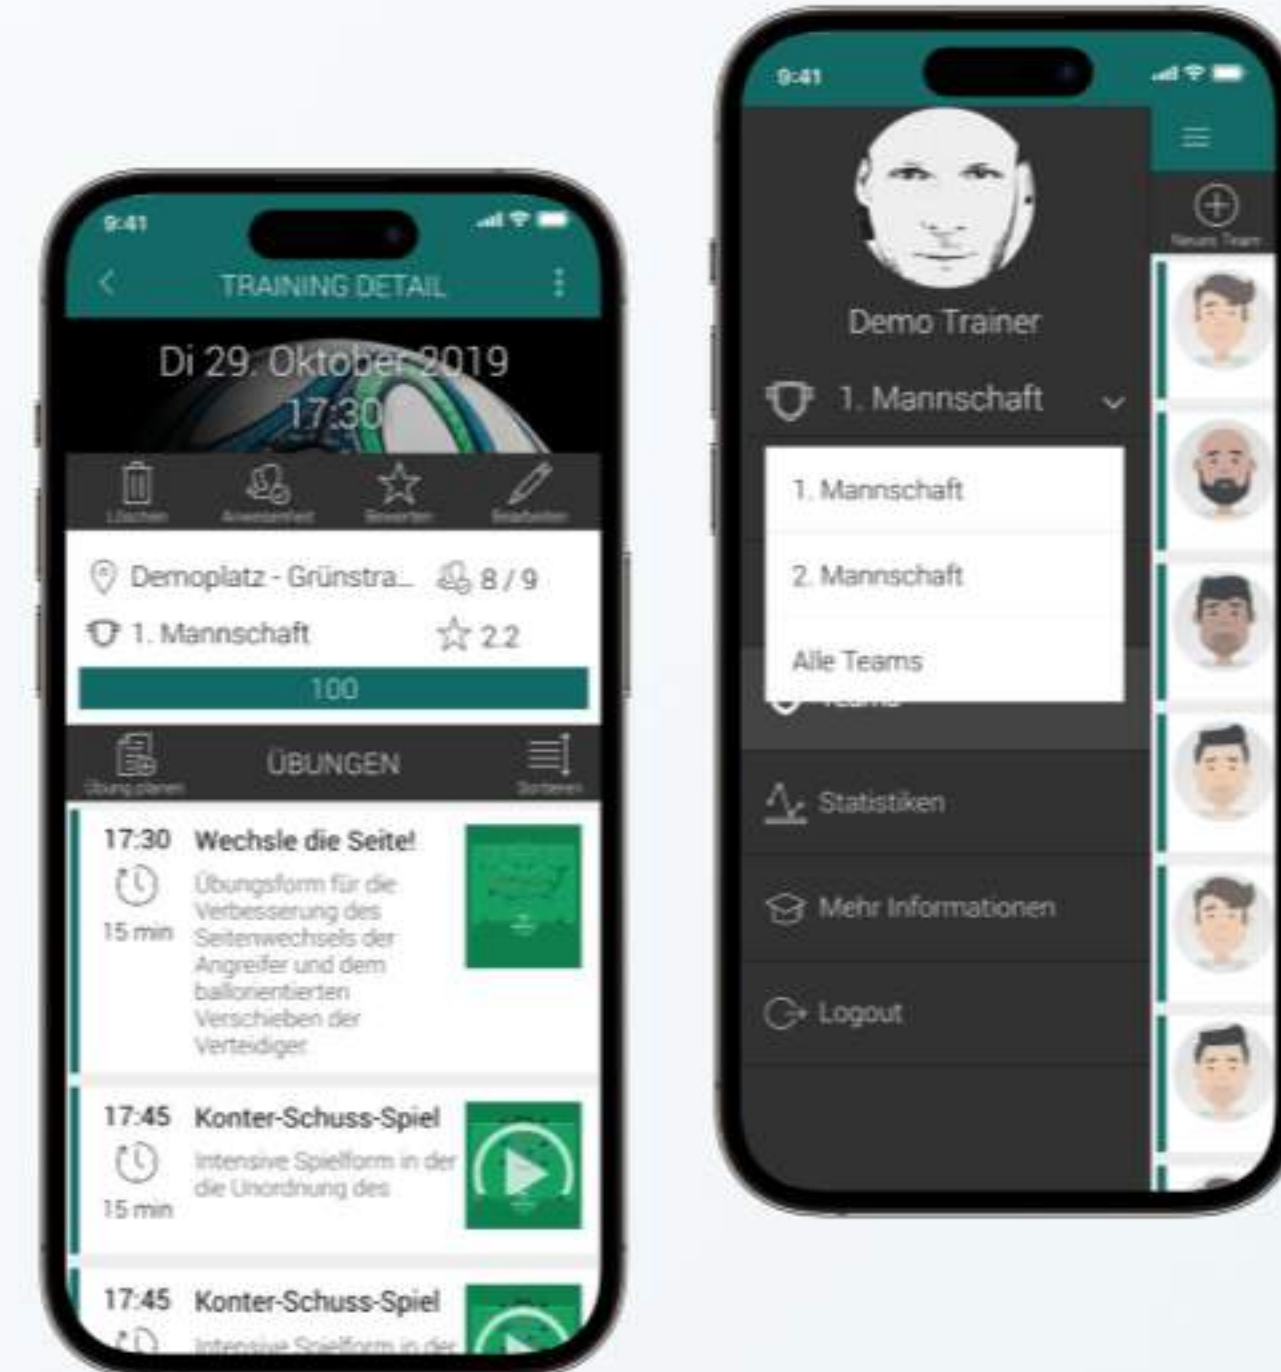

Duration: 2018 – 2022

Technology Stack

- Front-End: JavaScript, jq.mobi, AngularJS, Ionic
- Back-End: Meteor, MongoDB
- Infrastructure: Modulus-based app

99coaches simplifies training session planning and team management. This Germany-based startup digitizes these processes, reducing trainers' paperwork.

Challenges included migrating the app environment, ensuring performance on old devices, and implementing offline functionality. IT Craft's solutions ensured smooth performance and accessibility.

CLIENT'S TESTIMONIAL

“The Agile approach of IT Craft to develop the app is just meeting our needs perfectly to scale the product in the best possible way.”

Smart 5D transforms property visualization with an iOS app and indoor navigation service

Industries: Real Estate

Duration: 2016 - 2018

Technology Stack

- Front End: Unity, OnlineMaps, ClipperLib, Poly2Tri, UniRx, Strangeloc, Blender, AngularJS, Bootstrap
- Mobile: Swift, Java
- Back End: OnlineMaps, Unity, ClipperLib, Linux, MySQL, Laravel

Smart 5D redefines property visualization for owners, agents, and buyers. This cross-platform solution offers immersive 3D tours and customizable interiors.

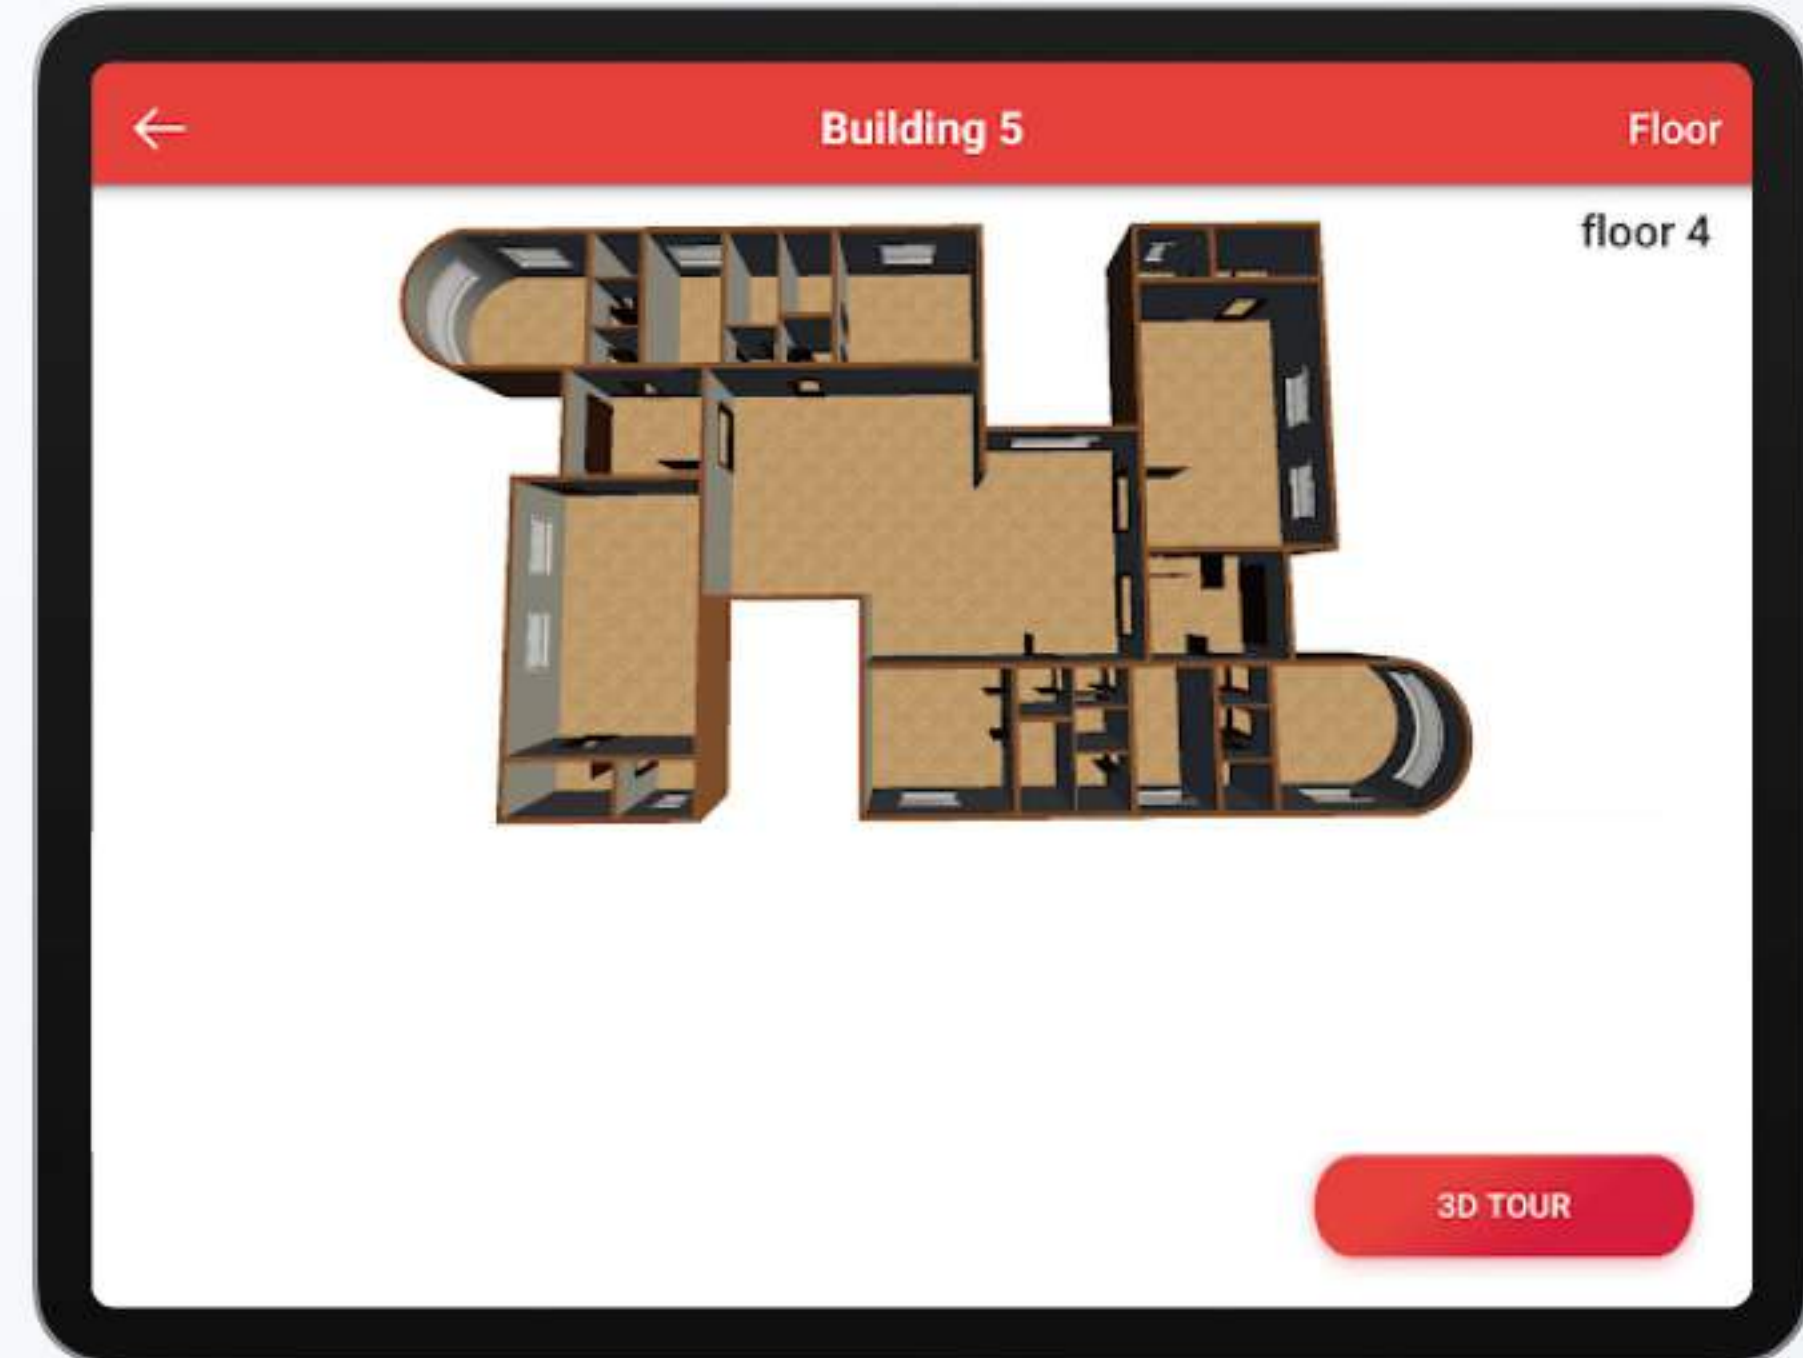

Challenges included server-side parsing of DWG files, implementing 3D maps, and transmitting large maps on mobile devices. IT Craft's solutions ensured high performance and seamless user experience.

Enhanced legal record management with a streamlined web app

Industries: Healthcare

Duration: 2019 – ongoing

Technology Stack

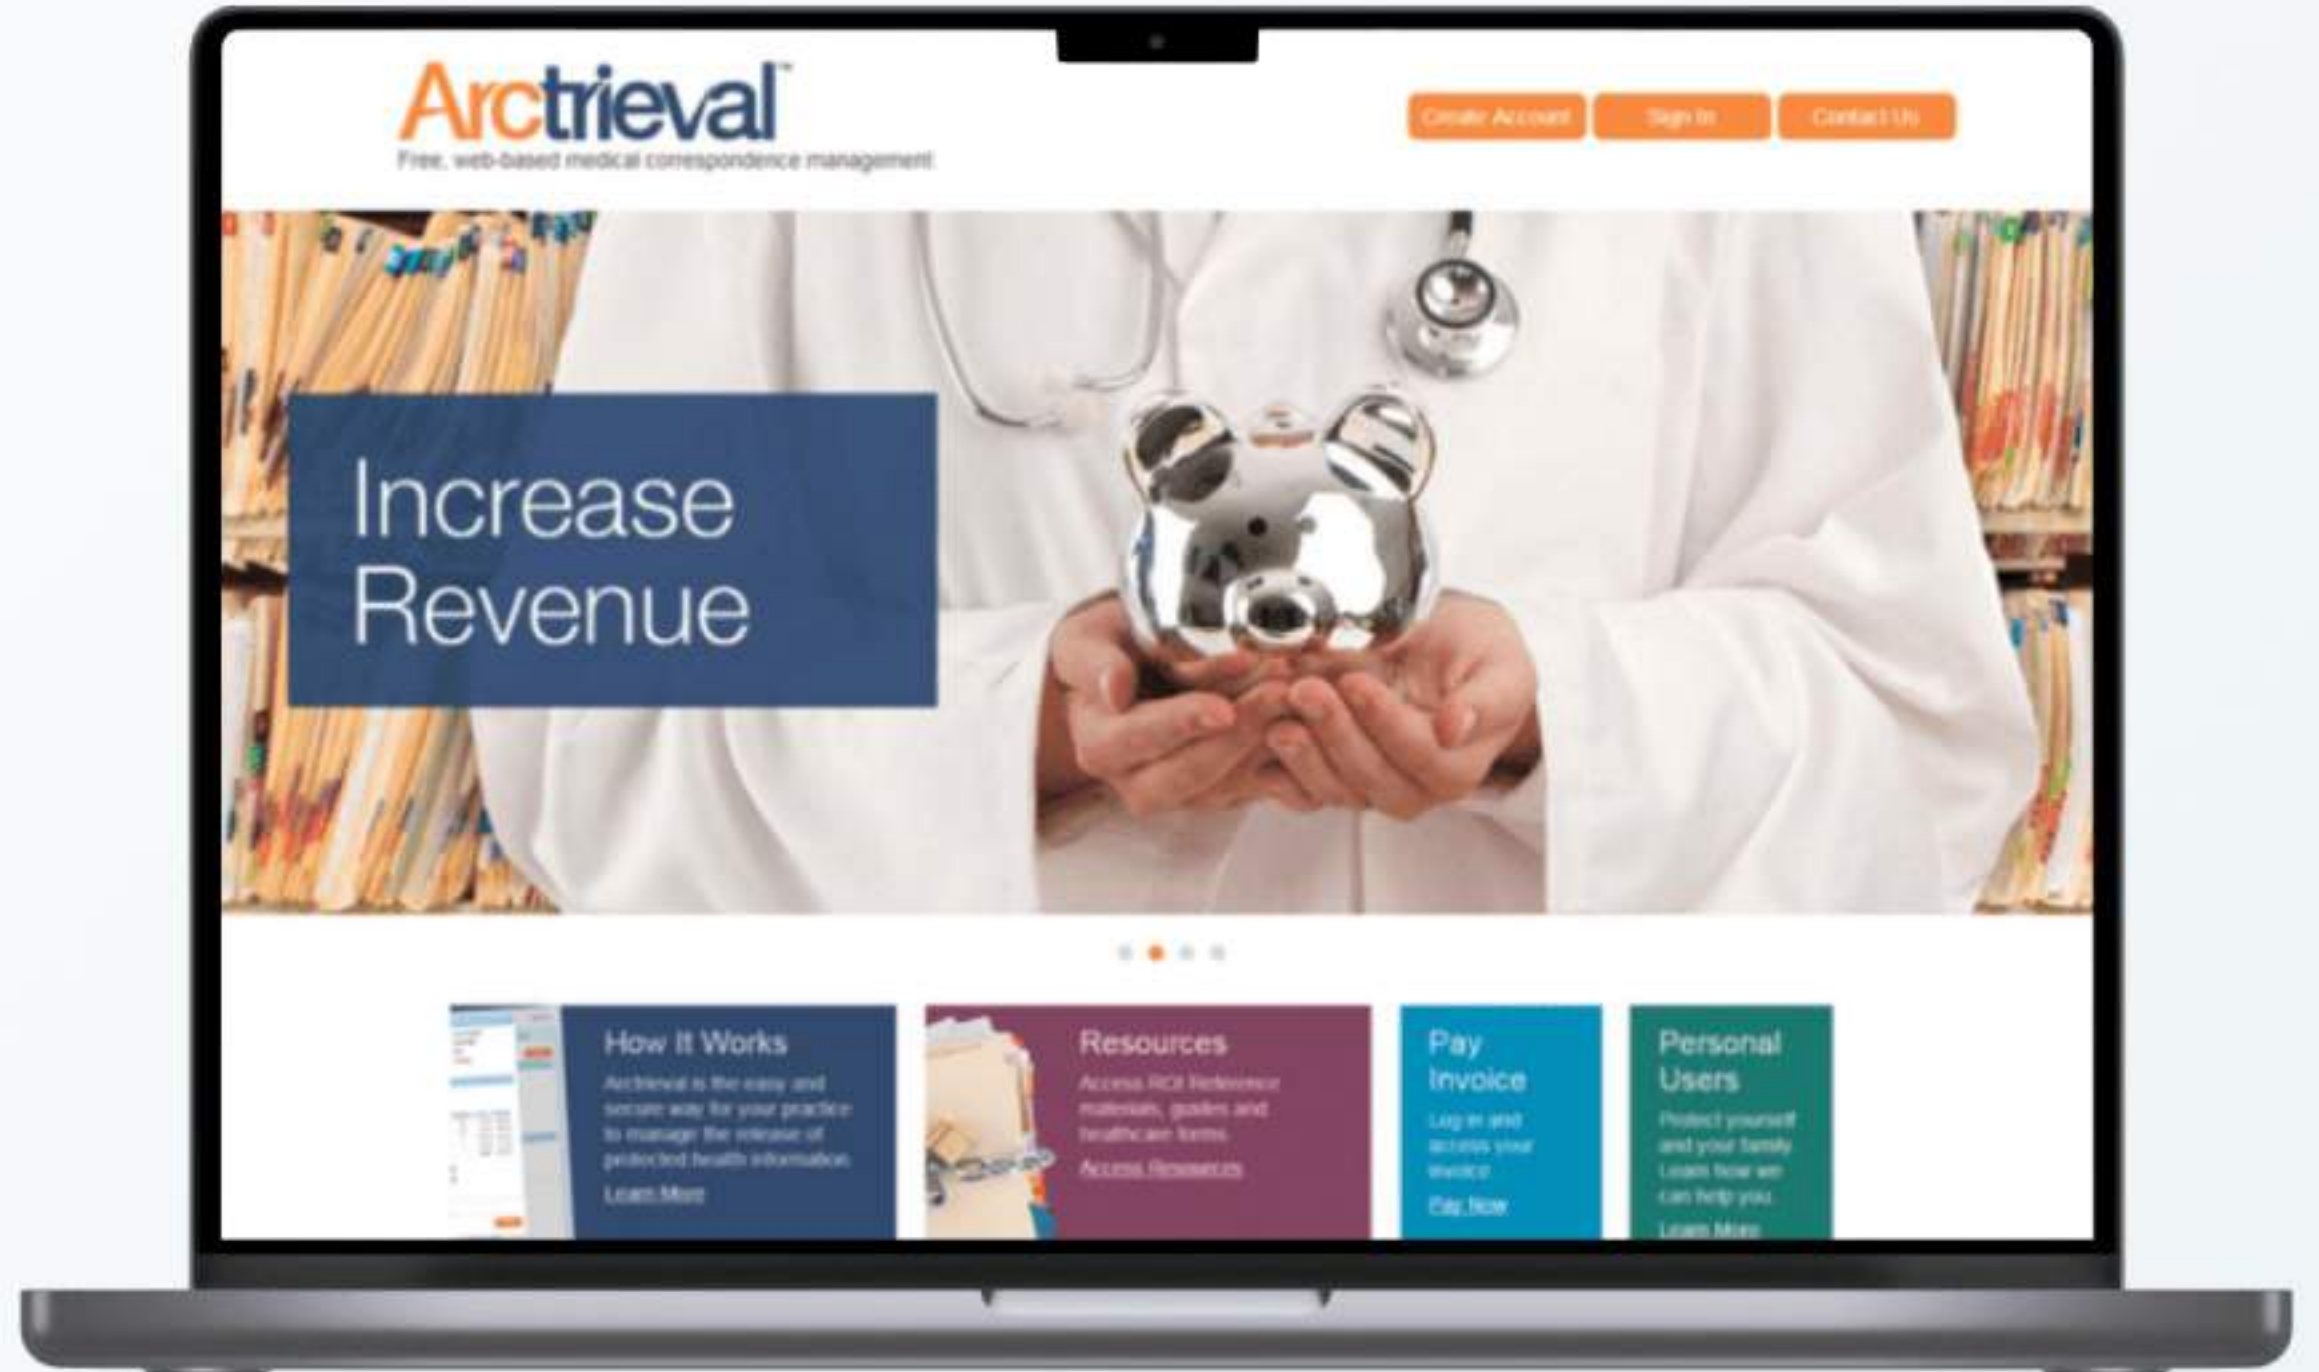

- Front End: Angular, RxJS, NgRx
- Back End: C#, ASP.NET Core, MS SQL, SQL
- Third-Party Services: Dapper, HTML to PDF, Stripe

Arctrieval Legal helps manage medical and billing record requests for legal professionals. This HIPAA-compliant app automates sending and receiving patient data requests, reducing errors and delays.

IT Craft implemented flexible subscription plans, integrated mailing services, improved signing functionality, and delivered an MVP, enhancing workflow and user experience.
